

CEDAR SHINGLES

A stunning roofing option that lasts several decades, cedar shingles are a popular addition.

Installed onto our tongue & groove roofs, with the addition of roofing membrane and house grade tile batons, cedar shingles not only look great they come with many benefits as shown below.

Our batons are spaced at the optimum distance, ensuring a greater overlap and thicker overall covering. Stainless fixings are used to ensure strong and long term fixing whilst preventing unsightly run marks.

Due to the additional timber and weight of the roof structure, we add upgraded timbers and roof 'A' frames to prevent any sagging and flex in the roof over the buildings life.

- ★ Expected lifespan of over 30 years
- ★ Additional insulation values
- ★ Attractive appearance
- ★ Maintenance free
- ★ Complements our buildings
