

THERMOWOOD TIMBER

olympian

GARDEN BUILDINGS

- 30 year lifespan (equivalent to cedar)
- Improved paint finish
- Will not shrink
- Will not expand
- Greater stability (less splits over time)
- Heated to over 200°C
- All resins removed
- Increased weather protection

Windows, doors and all trim items are only available in tanalised timber.

ThermoWood® properties

- Improved durability against decay
- Reduced splitting strength
- Reduced moisture content
- Consistent colour through the piece
- Improved dimensional stability
- Slightly reduced bending strength
- Reduced thermal conductivity
- Resin removed
