

# KATEPAL Roofing Shingles

olympian

GARDEN BUILDINGS  
Est. 1983

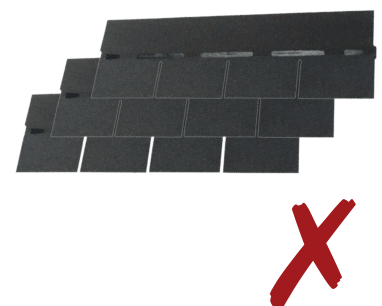

- **Market-Leading:** a superior alternative to traditional roofing felt, they provide an attractive, maintenance-free, and long-lasting roofing solution.
- **Proven Durability:** Katepal, a Finnish manufacturer with a history dating back to 1949, is renowned for its roofing shingles' ability to endure extreme weather conditions. From freezing arctic conditions to scorching tropical climates, they have proven their durability.
- **Moisture Protection:** they also provide a robust barrier against humidity, effectively preventing moisture ingress.
- **Ideal for Outdoor Buildings:** they are perfect for use on wooden outdoor structures such as buildings and sheds, and used and recommended as roof covering in houses in Finland.
- **Exceptional Adhesive:** With a strong adhesive and granular surface, they provide excellent adhesion, enhancing the roof's overall durability. This ensures a reliable seal and a roof that can withstand storms.
- **Longevity:** designed to last, with a life expectancy of more than 20 years, ensuring long-lasting protection for your structure.

Katepal Shingles shown on an Olympian Garden Building.

Katepal Shingles shown on a house in Finland.

We never use low quality shingles with poor adhesive.
